

PCSG invented text formatting for the Model 100.  
Now 18 months later we present...

# Write ROM<sup>®</sup>

\$149.95

## Text processing that is better.

Now you can not only format your documents with left and right margins, page numbers, headers and footers and the like, but you can do things that considerably expand your text processing capacity. WRITE ROM gives you "memory writer" capability. It has a library function that lets you type a single code to automatically insert favorite words, expressions or whole paragraphs. You do underline, boldface and other printer features with easy to remember Graph U's or Graph B's etc. In all there are 44 features and functions that bring real text processing power to the Model 100.

PCSG lets you decide for yourself. If you are not convinced of the superiority of WRITE/ROM simply return it within 30 days for a full refund.

**PORTABLE COMPUTER SUPPORT GROUP, INC.**  
11035 HARRY HINES BLVD., #207, DALLAS, TX 75229  
FIRST WITH SOFTWARE FOR THE MODEL 100. 1-214-351-0564

## What Write ROM can do:

Write ROM gives you incredible power. These features represent only some of what you can accomplish with this excellent ROM software.

1. Search and replace with function key ease.
2. Word count and line count with a function key.
3. Library-Memory Writer "boiler plate" feature takes words, phrases and blocks of text from another file and inserts them into the printed document.
4. Expand—lets you build your own shorthand system and prepare cryptic documents that take up little memory (same as Library).
5. Chain—permits multiple files to be printed as one document. Include—inserts other files anywhere in your document.
6. Map—shows pixel layout picture onscreen the way formatted document will appear with a dot for each letter or punctuation.
7. Reference number printout—you can keep files of numbered customer names and addresses or suppliers or even inventory items. Write ROM will print out entries any place you enter the desired number.
8. Merge—Send same document to different names on your mailing list, personalized form letters.
9. Automatic transmit—with a function key you can dial another computer and transmit your document with all sign on protocol automatically handled by Write ROM.
10. Uses zero K of RAM to store the program or for operating overhead. Except for your headers or footers and printer set up codes all RAM is available for your documents.
11. Centered headings left and right, top and bottom. Centered text left and right, top and bottom.
12. Justified right margins or ragged right edge.
13. Print multiple copies.
14. Numbered pages top, bottom or both. Shows as 1,2 not 01,02.
15. Set right and left margins global or at will.
16. Start numbering at your choice of page numbers.
17. Title page, including title page in middle of document.
18. Memo format (optional line space between paragraphs).
19. Standard block, modified block or any original letter format.
20. Indented paragraphs.
21. Headers or footers or either.
22. Date or time in header or footer, or any place in document.
23. Chapter end feature, page feed or conditional page feed.
24. Optional extra page at end of document.
25. Justified and ragged edge in same document.
26. Pause between pages.
27. Skip lines feature for photo or illustration insertions.
28. Double, triple or more line spacing.
29. Multiple margin settings in same document.
30. Favorite format spec file (no setting each time).
31. Underlining and other printer features controlled by simple graph characters (e.g. graph B = bold on and off).
32. Redirectable output to printer, serial port or another file.
33. Width up to 132 characters.
34. Set top and bottom margins.
35. Optional header and footer on pages you choose.
36. Begin printing at any page number, print choice of pages from multiple page document.
37. Interrupt and resume printing.
38. Start/stop at designated page.
39. Suppress printing of 'orphan' lines.
40. Global printer command codes set with function keys.
41. Does not interfere with other machine code programs in your computer.
42. Supports printing of special characters.
43. Tab—recognizes tabs used in document.
44. Carriage return/line feed control for multiple printer access.
45. Wordstar compatible "dot commands" for preparing documents for your desktop computer.
46. Supports serial and parallel printers.
47. "Temporary indent" command to allow paragraph tags that are offset to the left of the paragraph (as this section is formatted).
48. Blindingly fast—no one can claim faster operation.
49. Copy document to a new name in RAM with a function key or rename a document.
50. Main menu look—you move the wide bar cursor to the document filename and use function keys to perform the magic.
51. On Snap-in ROM that presses in or out easily to allow you to use other ROMs like Lucid.

Plus other features that will delight and surprise you.

Text processing power that no other program can equal.

# Write ROM<sup>®</sup>

on Snap-in<sup>™</sup> Cartridge \$149.95

**PCSG says "Send it back in 30 days for a full refund if you don't agree."**

WRITE ROM is the definitive word processing extension for the Model 100. Less than two months after the Model 100 was announced Portable Computer Support Group introduced the very first text formatter for the Model 100. That program, called Write+ was licensed to Tandy and is now in Radio Shack Computer Centers as Scripsit-100. Write+ had many powerful features and most reviewers still say it is the best of the cassette based text formatters.

But now eighteen months later PCSG has introduced WRITE ROM. Those who experience it have said "WRITE ROM literally doubles the text processing power of the Model 100."

WRITE ROM is what you would have expected PCSG, the software leader for the Model 100, to develop in the 18 months since Write+ was brought to the market.

First of all WRITE ROM as it's name implies is on a snap in ROM. You

simply take a quarter and open the little compartment on the back of your Model 100 and press in the ROM cartridge. It is as easy as an Atari game cartridge and can be snapped in and out instantly so that you can use other ROM programs whenever you wish.

WRITE ROM appears on the main menu just like one of your built in programs. It lets you do every formatting function you would expect like setting margins, centering, right justifying and having headers and footers. But it does them under function key control, with the clear and easy to learn and use techniques for which PCSG has become famous.

In keeping with PCSG's long standing reputation for superlatively simple yet comprehensive documentation, the manual is a model of lucidity.

WRITE ROM remembers your favorite format settings so that you can print a document without any set up, but you can change any formatting or printing parameters instantly with a function key.

WRITE ROM's 'pixel mapping' feature shows you an instant picture on the screen of how your printout will look on paper. Incidentally, PCSG introduced this feature on the Olivetti M-10 version of Write+ over a year ago.

In all there are 44 separate features and functions that you can do with WRITE ROM, and some of these features are truly breakthroughs for the Model 100.

First, WRITE ROM lets you do search and replace, with function key ease of course. Any word or phrase in a document can be searched for and replaced with any other phrase where the search words appear.

Second, WRITE ROM lets you send any text (formatted or not) to any other computer over the phone with just a function key. What's more, it dials and handles sign on protocol automatically.

Third, WRITE ROM has a wonderful feature called 'Library' that gives your Model 100 power that you never thought it could have. Library lets you

record favorite phrases, words, or commonly used expressions (sometimes called boilerplate). Any place you wish any library text to appear in your document you just type in a code. WRITE ROM automatically inserts the text just like a Xerox Memory Writer.

The library phrase is inserted as your document is being printed rather than as it is being typed, so this feature conserves memory in documents where a long phrase is used repetitively, since each occurrence of a library phrase in your document is indicated by a single code character.

This Library feature is so powerful these two pages could be devoted just to telling you about things it can do. For example, you can have names and addresses that you designate in one text file with a customer or supplier number. Or you can have inventory items with stock numbers.

In your document you simply type in the customer or stock number and that entry from the other file is automatically inserted in the document. Picture what you can do with that kind of capability.

Because WRITE ROM is written in machine code, it is blindingly fast. No one can claim faster operation.

Because it is on a ROM it uses virtually none of your precious RAM for its operation, and it does not interfere with other machine code programs in your RAM. It works with any printer, serial or parallel. At the touch of a function key you can find the size of a RAM file in bytes and in words (ideal for journalists and other writers who need to know how many words are in a piece). You can make a duplicate copy of a document file under a new name. You also can rename or delete (kill) any RAM file with function key ease.

This description only scratches the surface of this amazingly powerful piece of software. You can automatically insert the date or the time anywhere in your document; WRITE ROM senses when you are nearing the bottom of a page, and at your command will start a new paragraph on the next page.

Write+ was the Model 100 pioneer in the use of 'dot commands' to allow control of such things as margins, centering, line spacing and other appearance related changes in the middle of a document. WRITE ROM goes a step further by making all the dot commands Wordstar compatible. This means that if you wish you can quite easily prepare a Wordstar compatible document. Then you can use features of WRITE ROM (such as pixel mapping) that Wordstar lacks, before uploading to your desktop.

A Mail Merge feature allows you to send the same document to every name on your mailing list, personalized for each recipient.

WRITE ROM enables you to do underlining, boldface and correspondence mode as well as any other font feature that your printer supports in a way that is so unique many users say "It is worth the price of the program just to have this one feature."

Here's how it works: When you want to underline you don't have to remember some complicated printer code. You just type Graph U, and to end underline you just type Graph U again. For boldface it's Graph B and to end boldface it's Graph B again. It's easy to remember and easy to do. WRITE ROM lets you record the codes from your printer's manual one time only and then just use these easy to remember signals any time you want to do a printer font feature.

WRITE ROM does so many things that other text formatters cannot do.

For example you can not only double space but triple, quadruple or any other.

WRITE ROM allows you to use your TAB key in a document so that you can indent the first line for a paragraph easily or space rapidly over many tab stops.

WRITE ROM has another nice feature. It allows you to undent. This means that you can have paragraphs that have a first line that projects to the left of the remainder of the paragraph.

WRITE ROM allows you to not only center a word or phrase on a line but you can center copy vertically on a page as well.

There are many other examples of excellent programming evident in WRITE ROM. The line feed problem of the Model 100 is dealt with by the simple use of a function key. Files are selected by moving the wide bar cursor over the WRITE ROM menu.

PCSG makes the claim that WRITE ROM is the easiest, fastest and most feature rich text formatter for the Model 100, as well as being the only one on a Snap-in ROM. You can do more with WRITE ROM than anyone thought possible for the Model 100. We at PCSG are happy to offer WRITE ROM because it expands the Model 100 to a dimension of text processing you cannot equal on even larger computers.

If you are already a PCSG customer you know the impressive quality of PCSG craftsmanship. We brashly state that WRITE ROM is the best you can buy. But don't take our word for it. It is sold on a thirty day trial. If you aren't as excited as we are, return it within 30 days for a full refund. Priced at \$149.95, on Snap-in ROM. Mastercard, Visa or COD.
